Re: Stanadyne, Inc. - Chemical Recovery Systems, Inc.

Dear Ms. Sheppard-Johnson:

This letter is to confirm that Moen Incorporated, successor to Stanadyne, Inc. ("Moen") is in receipt of EPA's Special Notice and Negotiation Moratorium correspondence dated June 26, 2001 concerning Chemical Recovery Systems, Inc.

Moen is willing and does intend to participate in future negotiations regarding appropriate and proportionate responsibility, if any, for the RI/FS and other potential costs at the CRS site. Any payment by Moen would need to be based on fact and data and appropriately supported. Further, should a PRP steering committee be formed, Moen would be interested in working through this group to represent our interests. Finally, Moen reserves the right to contest any and all allocations and potential liabilities based on actual shipments to the subject site.

At the June 27, 2001 meeting in Chicago, EPA indicated that witness lists, and statements and the digital pictures shown during the meeting would be made available upon request. These are important to us, as we believe they will support our position as having a de minimus position in this matter. At your earliest convenience please forward the same to my attention.

Please feel free to contact me at (440) 962-2143 should additional information be required.

Sincerely,

Dennis W. McKinney, CSP, REM
Director, Environmental, Health and Safety
